Dear Sir or Madam,

I am sending my response to your recent post. I feel that I possess the professional and educational background that will enable me to successfully meet and exceed the demands and expectations of this position.

My education at Kean University has given me a strong background on software developing, analyzing and designing. I am proficient in Java, Html, Php, CSS, JavaScript, MySQL database, MS Office and worked extensively with other programming language like Python. Me and my teammates have designed and analyzed a system called "OneBank" which allows user to have all their banking apps at one place. I have created an android app called "MoviesON" which is a clone app of Netflix. It has similar features like Netflix where users will have to create an account in order to use the app and other features like watch later list and search. I used firebase for user authentication and storing movies and I used SQLite to keep track of watch later list. My teammates and I Designed, Analyzed and Developed a website for parking management, where user is able to register and login and out from the website. User is able to find available parking spot and able to check-in and out and much more. Html, Php, CSS and MySQL database are used for creating this website

The enclosed resumé provides an overview of my education and experience. I would love to meet with you at your convenience to discuss my qualifications for this position. Please leave a message any time at 732-647-8276 or email me at panchanb@kean.edu. Thank you for your time and consideration. I look forward to meeting with you about this great opportunity.

Yours sincerely,
Bhavin Panchani
